

Oficina de Proyectos Internacionales

El **esquema ERA-NET** surgió como nueva herramienta del VI Programa Marco de investigación, desarrollo tecnológico y demostración de la Unión Europea (VI PM). Su **objetivo** fundamental es fomentar la **cooperación y la coordinación** de las **actividades y políticas de investigación** desarrolladas en los **Estados Miembros y Estados Asociados** a través de sus respectivos **programas de investigación, nacionales y regionales** con el objetivo de reforzar el **Espacio Europeo de Investigación** (European Research Area, ERA).

Son **convocatorias transnacionales** a las que se aplican **procedimientos** de solicitud, evaluación y selección de propuestas **comunes**, que han sido elaborados y consensuados por todas las agencias participantes.

Los **proyectos** que se presentan son de **dos/tres años**, cercanos al mercado, y con el **objetivo** de cubrir necesidades en **temáticas estratégicas** de alto valor añadido europeo.

Las **ERA-NETs** pueden ser de **cualquier ámbito** de la **Ciencia** y la **Tecnología**.
