Urgente: Soluciones de IA Y BD para ayudar a combatir COVID-19

23/03/2020

Convocatorias

¡¡Urgente!!

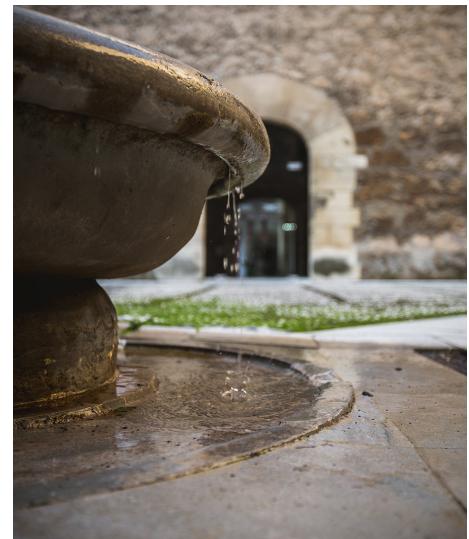

Soluciones de Inteligencia Artificial y Big Data para ayudar a combatir Covid-19, que estén disponibles para su implantación directa y fácilmente escalable.

• **Deadline:** 23 de Marzo de 2020

• **Contacto:**

Hemos recibido una solicitud urgente de la **DG CNECT A1 (AI) en relación con las soluciones de Inteligencia Artificial y Big Data para ayudar a combatir Covid-19**, que estén disponibles para su implantación directa y fácilmente escalable.

El plazo del **DEADLINE acaba HOY**, por lo que sería conveniente que los interesados se pongan en contacto **LO ANTES POSIBLE** con la técnico responsable a través de la siguiente dirección de correo electrónico:

Texto Original

We have been tasked to collect information about solutions AI and big Data can

<http://ofpi.ugr.es/>

provide to help fighting COVID-19 (we are doing it also in parallel for robotics and other technologies).

The focus is particularly on solutions ready to be deployed (or which proven to be useful somewhere else - eg China, and we could benefit in Europe as well)

(we have read many articles about the potential contribution of AI to help, but here **we are looking for existing solutions**, where our action at the EC could help to deploy throughout Europe)

Could you please help us in collecting the following information:

- 1. Description of EU AI activities for hospitals in areas that are relevant to the corona
- 2. We need a systematic analysis: what can AI do to help (at home, in hospital (e.g. to accelerate diagnostics), in pharma lab (e.g. to test against existing molecules), etc)
- 3. Which AI/big data companies are relevant and can provide such solutions
- 4. What are the barriers and which action could the EC do to unlock them

Actually as priority, we should identify what can be done and deployed in the **short term**. (we need to act fast, therefore knowing what can be deployed quickly and which medical staff actually need)

As usual, we have very short deadlines (especially given the circumstances) – therefore any information you can provide until Monday noon would be wonderful! (please send them gradually, this would be extremely useful)
