Consortio internacional busca incorporar socio como coordinador

07/11/2019

Convocatorias

Desde la red de NCPs de Reto 5 (**NCP-CaRE**) informan que la entidad **Climate Analytics Germany**, junto con otros partners europeos está buscando incorporar urgentemente un coordinador para la propuesta que están preparando en el siguiente topic:

Topic LC-CLA-10-2020 a) Assessing and designing climate policies for the coming decade.

LC-CLA-10-2020 a) Assessing and designing climate policies for the coming decade. Climate Analytics is already a WP leader of more than 5 H2020 projects at different implementation stages. For this topic, Climate Analytics could join as a strong WP leader on quantitative analyses of policy measures and good practices covering the analysis of climate policy interventions in the pre-2020 period and the development of recommendations for 2030 and post-2030 and to provide scenarios on policy transformation etc.

We are in talks with a few strong EU partners and have already been thinking of a concept to address this sub-topic a) Assessing and designing climate policies for the coming decade.

We would be happy to share our concept and further the thinking with a potential coordinator.
