

## Workshop on Industrial Technologies for Regional Growth

09/03/2016

### Actividades

Synergies between **EU funding** for **research & innovation** and **structural funds** are essential to develop regional research and **innovation capacities**, and drive the **economic growth** in **Europe**.

The **EC** is organizing a **workshop** to support this smart specialisation (**RIS3**) and to encourage dialogue and **exchange** of ideas between the different **stakeholders**.

The **event** will take place next **April 12th** in **Brussels**.

The expected **audience** are **participants** in the Key Enabling Technologies (**KETs**) programme in **H2020** and national and regional authorities that deal with the **RIS3** and/or the implementation of structural funding.

Sign up for the **workshop**:

- get in-depth examples of good practice;
- Collect some concrete recommendations on how to improve synergies between funding programmes at the regional level in the areas of KETs.
- learn more about the main barriers for addressing synergies from H2020 stakeholders and national and regional authorities.

### Programme
